## Job Application for Software Engineer

Dear Hiring Team,

### About Me

---

I am writing to pursue a possible software engineering position with CME Group. I am interested in any position that will put my software engineering skills to good use.

Having recently completed my Bachelor's degree at UMSL, I have experience writing and testing code in a number of languages such as Java, Javascript and C/C++. I have worked in a number of programming environments, including Windows, UNIX/Linux and MacOS, and I have used many tools such as those offered by Eclipse, Git, and Violet UML. I enjoyed using and sharpening these skills, as well as working as part of Agile development teams, and believe this opportunity will allow me to continue doing so in a professional capacity.

### Why CME Group?

---

As a recent computer science graduate with a passion for software development, CME Group, seems like a perfect fit for me. While I am a self starter and capable of working independently, I have always desired to contribute to something bigger, and so working for a company with such a global impact appeals to me greatly. I would love to contribute to the success of this company with my own set of skills!

### Why Me?

---

I am a skilled developer with many talents that would be useful for this position, and a strong willingness to learn besides. Attached is my resume. Please call me at (206) 697-0392 with any questions you may have about me or my abilities. I look forward to your response!

Sincerely,

**Dillon J. Belton**
