Job Application for Software Engineer

Dear Hiring Team,

About Me

I am writing to pursue a possible software engineering position with Ascend Learning. I am interested in any position that will put my software engineering skills to good use.

Having recently completed my Bachelor's degree at UMSL, I have experience writing, testing and debugging code in a number of languages such as C/C++, HTML, Java and Javascript. I have an understanding of MVC programming standards, as well as relational databases and the languages that govern them (such as SQL). and I have used many tools such as those offered by Eclipse, Git, and Violet UML. I enjoyed using and sharpening these skills, as well as working as part of Agile development teams, and believe this opportunity will allow me to continue doing so in a professional capacity.

Why Ascend Learning?

As a recent computer science graduate with a passion for software development, Ascend Learning, seems like a fantastic fit for me. Ideally, my perfect job would allow me to work alongside industry professionals every day while tackling a wide variety of problems. For this reason I find myself being drawn to Ascend Learning, and I would love to contribute to the success of this company with my own set of skills!

Why Me?

I am a skilled developer with many talents that would be useful for this position, and a strong willingness to learn besides. Attached is my resume. Please call me at (206) 697-0392 with any questions you may have about me or my abilities. I look forward to your response!

Sincerely,

Dillon J. Belton
