Job Application for Software Engineer

Dear Hiring Team,

About Me

I am writing to pursue a possible software engineering position with Trust Company of America. I am interested in any position that will put my software engineering skills to good use.

Having recently completed my Bachelor's degree at UMSL, I have experience writing and testing code in a number of languages such as Java, Javascript and C/C++. I have an understanding of the software development lifecycle and I have used many tools, such as those offered by Eclipse, Git, and Violet UML. I enjoyed using and sharpening these skills, as well as working as part of Agile development teams, and believe this opportunity will allow me to continue doing so in a professional capacity.

Why Trust Company of America?

As a recent computer science graduate with a passion for software development, Trust Company of America, seems like a perfect fit for me. I am a self starter and a logical thinker, and while my degree is in computer science, I have always valued myself as somewhat of a businessman. I would love to contribute to a company that values all of the skills I have to offer!

Why Me?

I am a skilled developer with many talents that would be useful for this position, and a strong willingness to learn besides. Attached is my resume. Please call me at (206) 697-0392 with any questions you may have about me or my abilities. I look forward to your response!

Sincerely,

Dillon J. Belton
