COMPANY LOCATION

Job Application for Software Engineer

Dear Hiring Team,

About Me

I am writing to pursue a possible software engineering position with ARRIS. I am interested in any position that will put my software engineering skills to good use.

Having recently completed my Bachelor's degree at UMSL, I have experience writing and testing code in a number of languages such as Java and Javascript. I have developed in a number of environments, including Linux, Windows and Mac OS. I enjoyed using and sharpening these skills, as well as working as part of Agile development teams, and believe this opportunity will allow me to continue doing so in a professional capacity.

Why ARRIS?

As a recent computer science graduate with a passion for Software Development, ARRISseems like a perfect fit for me. The company's history of success and the highly dynamic (and genuinely interesting) video and broadband industry it operates in appeal to me greatly, and I would love to contribute with my own set of skills!

Why Me?

Attached is my resume. Please call me at (206) 697-0392 with any questions you may have about me or my abilities. I look forward to your response!

Sincerely,

Dillon J. Belton
